

We are seeking a Software Developer Manager to become an integral part of our team! You will be responsible for the collaboration of a team of Sr Developers and other departments in the design and development of high-quality business solutions in a fast-paced, high-volume environment, utilizing the waterfall method of SDLC.

This job is in Macon, GA and requires the candidate be local or willing to relocate/commute (within 45 miles of office location).

**Responsibilities:**

- Develop and oversee department procedures and operations
- Assist in strategic planning and risk analysis
- Review user and technical documentation to confirm consistency with program operations
- Provides technical assistance by responding to inquiries regarding errors, problems, or questions with programs.
- Work with Sr Developers and/or other departments to meet specification needs
- Recommend software upgrades to optimize operational efficiency
- Collaborate with other developers to design and optimize code

**Qualifications:**

- 5+ years in object oriented .Net design and development (C#, WPF, TFS, Git, SVN, web services, WCF, API, SOAP/REST,XML, MS SQL Server)
- Solid knowledge of SOA based design, architectural and integration patterns, including familiarity with micro-services
- Experience with VB.net, Entity Framework, and/or LINQ-To-SQL
- Excellent understanding of best practices, coding methods, and data security
- Demonstrated critical thinking, analytical and decision-making skills
- Outstanding written and verbal communication skills with the ability to present complex information in a clear and nontechnical manner to various audiences
